PROFILE

Full-stack developer with 3+ years of experience building fintech applications for Apollo Global Management through Space Inch. Strong background in React, Vue 3, and TypeScript, with a focus on maintainable code, usability, and reliable delivery in complex financial systems. Experienced with Redux, REST APIs, testing, and modern frontend tooling, with working knowledge of Next.js and Python.

WORK EXPERIENCE

SpaceInch / Apollo Global Management 05/2023 - PRESENT

Full-stack Developer

- Build and maintain fintech applications for Apollo Global Management, supporting complex trading and financial workflows.
- Deliver new features and improvements using Vue 3 and TypeScript in a demanding enterprise environment.
- Write maintainable, scalable code with strong attention to performance, usability, and long-term maintainability.
- Contribute to both frontend and full-stack development tasks across internal financial platforms.
- Collaborate closely with developers, stakeholders, and business teams to deliver reliable software.
- Integrate AI-assisted development tools such as Claude, Codex, and Cursor into daily workflows to accelerate implementation and improve code quality.

BISS 04/2022 - 04/2023

Frontend developer

- Worked on multiple frontend projects using React, TypeScript, Redux, REST APIs, and Zod.
- Built and improved responsive, user-friendly web applications.
- Wrote unit tests with Vitest and Jest.
- Contributed to refactoring, performance improvements, code reviews, and team collaboration.
- Worked with Jira, SonarQube, Jenkins, and Git in a professional development environment.

EDUCATION

Bachelor's Degree of Science in Web & Mobile Computing

RIT Croatia, Zagreb

- 2018 – 2022
